

2.2

MAY 17 1993

1991 - 1992

The Honourable Dr. David J. Carter
Office of the Speaker
Legislative Assembly of Alberta

Sir:

I have the honour to submit the annual report of Alberta Education
for the year ended March 31, 1992.

Respectfully submitted,

A handwritten signature in dark ink, appearing to read 'Halvar Jonson', with a stylized, flowing script.

Halvar Jonson

The Honourable Halvar Jonson
Minister of Education
Legislature Building
Edmonton, Alberta

Sir:

I take pleasure in submitting the department's annual report for the fiscal year which ended March 31, 1992.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "R. Bosetti", with a long horizontal stroke extending to the right.

Reno Bosetti

Minister's Message

The many significant accomplishments listed in this 87th annual report of Alberta Education all occurred before I was appointed Minister in December 1992. It is my privilege, however, to congratulate the former Minister, the staff of Alberta Education and all the partners in education on a job well done.

For me, the contents of this report are both an inspiration and a challenge.

I am inspired in that so many excellent programs have already been set in motion and are being carried on with considerable success. It is encouraging to know that so much has been achieved.

I am challenged in that our fiscal resources continue to decrease. It will be difficult to go on supporting every initiative in education, no matter how worthwhile. We are in an era of setting firm priorities and making difficult choices.

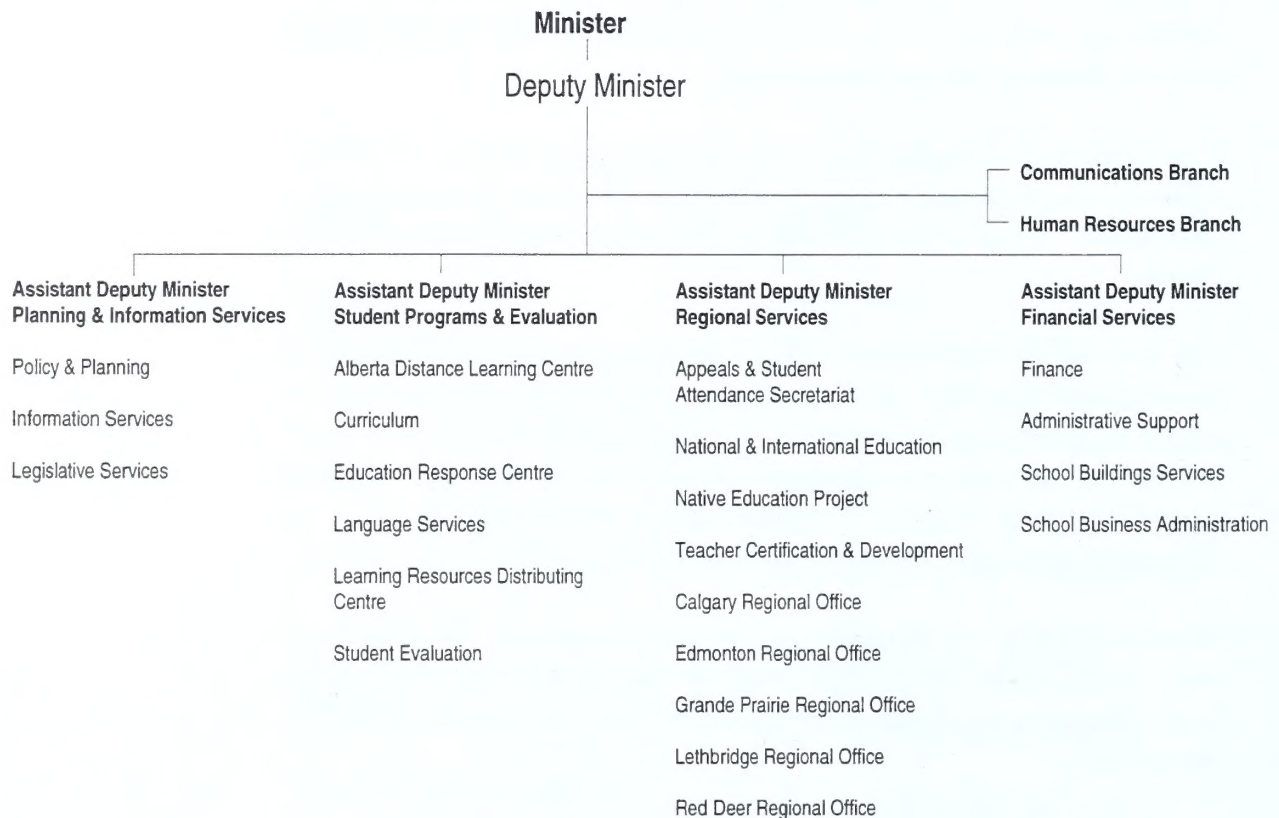

Can we continue what we have begun? Building new schools as needed and modernizing older ones? Assessing student achievement and measuring the results of our efforts in education? Ensuring that children have up-to-date and relevant curriculum in areas such as science, careers and technology, and second languages? Helping all students learn as much as possible, as thoroughly as possible and as quickly as possible?

My answer is that we must continue what is most essential. We must find ways to keep on providing a high quality of education to every child who is in the classroom now and to every child who will enter school in the next several years.

The trend towards partnerships with business and industry, and with community agencies, is one encouraging indication that there may be more efficient or less expensive alternatives to some of the traditional but costly methods of educating children. The progress of distance learning programs is another.

I predict that words like "setting priorities," "sharing," "coordinating," "being creative" and — "making do" will appear more and more often in future annual reports. I also predict that the education community of Alberta will prevail and thrive, as it always has, despite the many new challenges we face in the 1990s.

Alberta Education Organizational Chart 1991 - 1992

Report of the Deputy Minister

During the 1991-92 fiscal year, provincial government priorities in education included:

- preparing an action plan for the 1990s and launching an annual report on provincial educational performance
- planning for the future in the context of increasing provincial budget restraints
- developing and revising curriculum in science, mathematics, Career and Technology Studies, the Integrated Occupational Program, French language education, and second languages including Native languages
- working with other provinces to launch the School Achievement Indicators Program, a Canada-wide assessment project
- assisting special needs students by developing a draft policy on their integration in the regular classroom and improving coordination of services for them
- increasing the involvement of business, industry and community agencies in developing and delivering programs of study, setting standards of achievement, and establishing policies
- reducing the school dropout rate
- establishing a student registry
- developing and delivering new distance learning courses.

These key initiatives illustrate that the role of Alberta Education is to meet the needs of students in this province by providing leadership to school boards and to schools. We plan for the future, set academic standards, develop relevant curriculum, and encourage teachers to consider new ways of working with their students. We help members of the education community respond to and work with changes in the larger society, including fiscal limitations, technological advancements, changes in the family, and other social and demographic trends.

Once again, this annual report documents the commitment, initiative, talent and adaptability of Alberta's education community. To complete each of the challenging tasks described in this report, Alberta Education staff relied on the expertise and support of trustees, administrators, teachers, parents and community members. Education is a team effort, and we are fortunate in Alberta to have so many enthusiastic team players who consistently place a high priority on the education of our children.

Communications Branch

Key achievements in 1991-92

The Communications Branch worked with Alberta Education staff to develop communication strategies for:

- the *Vision for the Nineties* plan of action and the 1991 *Achieving the Vision* report
- the announcement of annual grants to school boards and capital project approvals
- the Excellence in Teaching Awards
- the student achievement testing program and the grade 12 diploma examinations program
- the Council of Ministers of Education, Canada, School Achievement Indicators Program
- the new Career and Technology Studies program
- the new Science 10 program.

Communications works with all branches of the department to keep Albertans informed about programs, initiatives, services and policies that contribute to the excellence of Alberta's education system. The branch also publishes **in•fo•cus**, a provincial newsletter, and **Intercom**, the department's internal newsletter.

Human Resources Branch

Key achievements in 1991-92

In addition to assisting branches with staffing matters, and job classifications, the Human Resources Branch sponsored a number of programs to train and develop staff. The branch's programs are aimed at enhancing skills and organizational effectiveness, and promoting employees' health, safety and general well-being.

Human Resources manages the department's personnel programs and services, assisting and providing information regarding staff recruitment, transfer, promotion and termination; job classification; employee relations; and performance management. The branch also provides a variety of training programs.

Planning and Information Services Division

Key Achievements in 1991-92

Strategic planning and policy

- The Policy and Planning Branch developed an action plan entitled *Vision for the Nineties*, in consultation with the Minister. The plan focused on initiatives that have high potential for improving student learning and called for the involvement of business, industry, media and the professions as well as the traditional partners in education.
- Long-range fiscal requirements of the education system were analyzed in the context of increasing provincial budget restraints.
- Fiscal equity alternatives were analyzed and developed. ("Fiscal equity alternatives" are options for ensuring that all school jurisdictions in the province have equitable access to the fiscal resources they need to provide a high quality of education for their students.)
- The budgeting and planning functions of Alberta Education were integrated.
- The Alberta Education policy manual was maintained and updated.

Program evaluation and assessment

- The Policy and Planning Branch published the first annual report of provincial educational performance (*Achieving the Vision - 1991 Report*).
- The Educational Quality Indicators (EQI) project continued to develop indicators for assessing the quality of education and identify areas for improvement.
- Evaluation projects included the Native Education Project Evaluation and the Teacher Education Task Force.

Information on trends and issues

- The Policy and Planning Branch conducted surveys of the general public, business and industry leaders, educators and students.
- Other information-gathering projects included updating basic facts and figures about education in Alberta, reporting on the supply of and demand for teachers in Alberta, and co-chairing a working group on education and training in Alberta.

The Planning and Information Services Division plans and initiates new projects and assists Alberta Education and school jurisdictions in planning activities that improve the quality of education. The Division also collects data and other information, and provides analyses and reports to the department and to school boards. Finally, the Division reviews legal issues in education and seeks opinions from the Attorney General in these areas.

Innovation in education

- The Policy and Planning Branch provided support and coordination for the federal START (stay-in-school) program and prepared drop-out prevention kits for teachers.
- Research was done on year-round schools, and information was distributed.
- Work was done, in cooperation with members of the education community, to improve science and technology education (through the Alberta Educational Technology and Research Foundation).
- Support was provided to the Southern Alberta Professional Development Consortium and the Alberta Consortium for the Development of Leadership in Education.

Student registry

- The Educational Information Exchange continued to develop and pilot a province-wide student registry for use by Alberta Education and school boards.

Specific tasks during this period included: identifying and defining data to be collected, developing and testing database and information systems, evaluating automated student records software and establishing provincial agreements with two recommended vendors, and piloting the electronic exchange of student data between Alberta Education and schools and/or school jurisdictions.

Legal issues

- The Legislative Services Branch consulted with the Attorney General's department on legal issues in education, including copyright law, fiscal equity, French language education rights, citizenship requirements for teachers, and enforcement of Attendance Board orders.
- The branch prepared amendments to the School Act and Regulations and to the Department of Education Act, facilitated the legal aspects of establishing and dissolving school districts, and assisted with the transfer of Department of National Defence Schools to provincial jurisdictions and the transfer of Alberta Education bookstores to Advanced Education institutions.
- The branch provided legal advice to appeal bodies administered by Alberta Education.

Student Programs and Evaluation Division

Key achievements in 1991-92

Proposal for a single high school diploma

- The Curriculum Branch asked school boards and other partners in education to comment on a proposal for a single high school diploma with specializations. Most of the more than 100 groups and individuals who responded expressed strong support for a single diploma.

New and revised programs in science and mathematics

- Work continued on a new Science 10-20-30 program, designed to emphasize the application of scientific knowledge and skills, and the relationships among science, technology and society. Over 60 professional, business and parent groups assisted with program development, review of resources and teacher inservice activities. Field testing of the Science 10 course was completed with the help of 100 teachers and 4600 students.
- The revision of secondary mathematics programs was completed, and in September 1991 revised Mathematics 30 and 33 courses were implemented. The primary focus of the revision in these two courses was to place an increased emphasis on problem-solving and analytic skills.

New programs to teach living skills and prepare students for the workplace

- Work continued on Career and Technology Studies (CTS). The first CTS program, Enterprise and Innovation, was developed, and a network of 1700 Alberta groups and individuals was established to assist with the preparation and delivery of CTS.
- The Registered Apprenticeship Program (RAP) was field tested.
- In 1991-92, the entire Integrated Occupational Program (IOP) for grades 8 to 12 was implemented, and nearly 4800 students in 75 school jurisdictions and 159 schools enrolled in the program.

French language education

- The Language Services Branch prepared French language editions of numerous Alberta Education documents, including the elementary and junior high Program of Studies (Programmes

The Student Programs and Evaluation Division creates, reviews and revises provincial school programs and learning materials for teachers and students. The division also creates, administers, marks and reports results on provincial achievement tests and diploma examinations.

d'études); the elementary, junior and senior high Guides to Education; and distance education courses in Accounting 10 and Mathematics 13, 14 and 20.

- Other services provided to francophone and French immersion schools included authorizing student and teacher resources, preparing teacher support resources, and preparing annotated bibliographies.

Second language programs

- The Beginning level of the new French as a Second Language (FSL) program for grades 1 through 12 was implemented on an optional basis in September 1991. In addition to providing the usual support resources and authorizations, the Language Services Branch published an annotated bibliography of supplementary learning resources and a document on student evaluation in FSL.
- Japanese language credit programs were offered in 15 schools in 10 school jurisdictions, with approximately 565 students enrolled. Alberta Education authorized two learning resources for Japanese as a second language and prepared a preliminary bibliography of supplementary learning resources.
- In 1991-92, 8490 students received special funding for English as a second language (ESL) instruction in school. Approximately 80 per cent of these students were in schools in Edmonton and Calgary. The Language Services Branch conducted a comprehensive review of new Early Childhood Services (ESL) teaching and learning resources, ECS to grade 12, and selected resources for inclusion in Alberta Education's annotated bibliography of ESL resources.
- New programs in Blackfoot 10-20-30 and Cree 10-20-30 were developed and approved by the Minister.
- *NOVA 1*, a new grade 1 Ukrainian language arts series, was developed by Alberta Education and published in cooperation with the Ukrainian Language Education Centre. Five ACCESS Network audio programs were developed to provide teacher inservice.

Student evaluation

- Alberta Education worked with the education ministries of Ontario and Quebec to develop and field test materials in mathematics, reading and writing for the School Achievement Indicators

Program (SAIP). The SAIP was established in 1990 by the Council of Ministers of Education, Canada, to provide national and provincial data on the achievement of 13- and 16-year-old students.

- In June 1991, 98,264 students wrote the grade 3, 6 and 9 provincial achievement tests. To complement these paper-and-pencil tests, the Student Evaluation Branch developed and field-tested several performance-based assessments.
- More students than ever before wrote the grade 12 diploma examinations. In the three administrations of diploma exams in the 1991-92 fiscal year (June and August 1991, and January 1992), a total of 69,816 students wrote 125,706 exams. Besides sending individual results to students, Alberta Education provided detailed reports to schools for use in instructional planning.
- In 1991, two public advisory meetings were held to discuss student results and standards. A meeting in July focused on achievement tests and a December meeting dealt with diploma exams. The participants, who represented business, the professions and other community groups, expressed enthusiasm for the opportunity to learn about provincial assessment programs, and they strongly endorsed an emphasis on high standards.

Special education

- At a Minister's Forum on Special Education held in May 1991, a broad cross-section of interested Albertans discussed these issues: integrating special needs students in the regular classroom, coordinating various services for special needs children, and funding special education programs.
- A consultation paper on the placement of exceptional students was distributed province-wide, and regional meetings were held on the integration of special needs students in the regular classroom.
- The Education Response Centre continued to work with other government departments and with health and social service agencies to improve the coordination of services to special needs children.
- Resources were developed to support school guidance and counselling programs, and a professional development program for school counsellors was planned and developed in cooperation with the Faculty of Education at the University of Alberta.

- The Education Response Centre provided a wide variety of services to schools and teachers; for example, coordinating career days programs, sponsoring workshops on challenging gifted students, and developing resources on behaviour disorders.
- The Materials Resource Centres, North and South, provided specialized equipment, kits and special format materials (braille, large print and audiotapes) to 552 visually impaired students.
- The Alberta School for the Deaf served 99 deaf and hard-of-hearing students, including 8 students who transferred from the Saskatchewan School for the Deaf.

Distance learning

- The Alberta Distance Learning Centre (ADLC) developed 19 new distance learning courses, several of which were in French. Each new course included audio and video cassettes in addition to the print components, and the science courses included laboratory kits. Question banks were developed for eight junior and senior high courses, and new videos were developed for Science 14 and Mathematics 30. A Computer Assisted Instruction (CAI) pilot version of Mathematics 13 was developed.
- The Distance Learning Program grant provided support for 11,316 distance learning course enrolments in school jurisdictions throughout the province. This course enrolment figure was 15 percent higher than in the 1990-91 fiscal year.
- Enrolments in ADLC courses also increased significantly in 1991-92, from 18,224 new students to 20,151 new students. (See Table 6, page 28 for details.)

Distribution of learning resources

- The Learning Resources Distributing Centre (LRDC) continued to provide quality learning resources for Alberta's students and teachers. Orders for 1,679,769 items resulted in sales totalling \$32,977,679.
- The LRDC Production Division, in providing materials for students in distance education programs and occasionally for other students and teachers, produced 73 million print impressions.

Regional Services Division

Key achievements in 1991-92

Consulting and leadership

The five Regional Offices of Education (in Grande Prairie, Edmonton, Red Deer, Calgary and Lethbridge) continued to support, advise and communicate with school boards, private schools and Indian band-operated schools in their regions. Following are some of the highlights of their work in 1991-92.

- helping schools implement program continuity policy and practice – often by sponsoring workshops and awareness sessions for parents, teachers, principals, superintendents and trustees
- encouraging school-community partnerships
- coordinating Ministerial reviews of disputes about special education placement decisions
- assisting and encouraging schools and school jurisdictions that are integrating more special needs students in regular programs
- supporting the establishment of consortia to provide professional development programs and inservice education for teachers (Lethbridge)
- responding to appeals on student suspensions and expulsions
- helping parents, teachers, central office administrators and school boards resolve disputes
- providing inservice training to teachers, superintendents and trustees on curricular, policy and legislative changes.

Monitoring and evaluation

Regional Office staff:

- coordinated school system reviews, provided leadership to teams of evaluators (superintendents, secretary-treasurers, trustees and other Alberta Education staff), and prepared evaluation reports
- monitored results achieved in selected subject areas (for example, junior high social studies and math)
- monitored instructional hours provided by schools
- monitored the progress of schools and school boards in developing policies (for example, policy on suspension and expulsion).

The Regional Services Division works closely with school jurisdictions and communities throughout Alberta and provides them with consulting, administrative, evaluation and planning services. The Division also provides direct services to students and teachers, including exchange programs and teacher certification services.

Ministerial reviews, attendance board cases and special needs tribunals

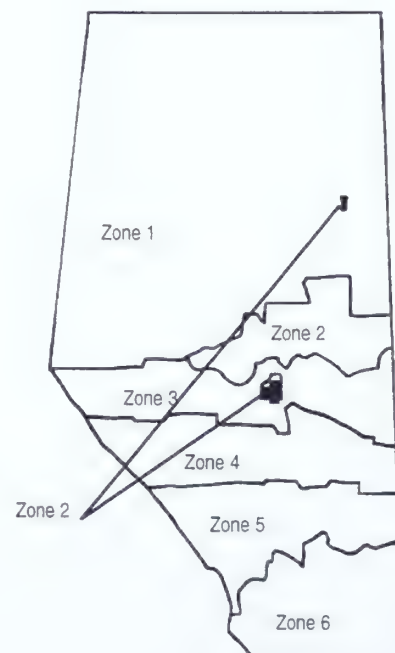

- There were 40 reviews by the Minister of school board decisions; most reviews dealt with special needs students (placement and funding).
- The Attendance Board heard 79 cases involving truant students (those who are under age 16 and fail to attend school as required by the School Act). In each case, the Board directed the student to an appropriate program.
- Two Special Needs Tribunals ruled on program requirements and funding sources for students whose special needs could not be met in programs provided by their school boards.
- During 1991-92, reviews by the Minister of school board decisions averaged one per week; and Attendance Board hearings averaged two per week. After a period of steady increase, the number of cases appeared to have stabilized at this level. Requests by school boards for Special Needs Tribunals for severely medically fragile and behaviorally disordered students increased as more of these children were being served in the public schools.

Teacher certification and development

- As of September 30, 1991, Alberta Education ceased to issue the Early Childhood Services (ECS) Diploma. The Diploma became obsolete because the qualifications for ECS teachers were the same as for teachers of other programs.
- A task force on teacher education, coordinated by the Council on Alberta Teaching Standards (COATS), made recommendations to the Minister. The recommendations dealt with teacher supply and demand, Native teacher education, and admissions criteria for the faculties of education. The task force began studying what a beginning teacher should be expected to know and be able to do, and how those expectations can best be communicated to universities and to the education community.
- The Excellence in Teaching Awards, a project of COATS, grew significantly in this third year of its existence. The number of nominations increased from 373 in 1990-91 to 567. As well, several corporations agreed to be sponsors of the awards program in 1992-93.

Zones served by Regional Offices of Education (ROEs)

Zone 1: Grande Prairie ROE
Zone 2 & 3: Edmonton ROE
Zone 4: Red Deer ROE
Zone 5: Calgary ROE
Zone 6: Lethbridge ROE

- COATS administered the Marshall McLuhan Distinguished Teacher Awards in Alberta. Five teachers from the province received this award, and one of them also received national recognition.
- COATS received 30 inquiries and six formal complaints regarding unskilled teaching practice. Following the appropriate procedures (preliminary inquiries followed by hearings and appeals as required), one teacher's certificate was cancelled and a second certificate was suspended with conditions for reinstatement.
- The Teacher Evaluation Impact Study examined the practices of various types of school jurisdictions related to teacher supervision and evaluation.

Native education

- The Native Education Project worked with the Metis Nation of Alberta (under the Framework Agreement between the Alberta government and the Metis Nation) to improve access to education programs and services for Metis people.
- The Native Education Project continued to implement the provincial Native education policy by: sponsoring workshops and Native awareness sessions for Native parents, students and teachers; monitoring and evaluating progress in the 46 school jurisdictions offering Native education programs and services; and providing consultative services to Native organizations.
- The Native Education Project and Language Services Branch jointly developed and published curricula for Cree 10, 20, 30, and Blackfoot 10, 20, 30. The Cardston School Division and Northland School Division helped to select and develop suitable learning resources for these programs.

National and international education

- The National and International Education Branch coordinated two six-month student (language) exchanges, one with Quebec, involving 80 Alberta students, and one with the Federal Republic of Germany involving 34 Alberta students. (See Table 13, page 60.)
- Twenty-two Alberta teachers and 22 teachers from Australia and the United Kingdom accepted exchange teaching assignments. (See Table 20, page 65.) These teachers received support and information from the National and International Education Branch.

Alberta also assisted Japan with the development of the REX (Regional and Educational Exchanges for Mutual Understanding) teacher program.

- Under the Alberta School Twinning Program, 44 Alberta schools were twinned with schools in Japan, Korea, China, Thailand, Botswana and Ukraine. (See Table 14, page 60.)
- Other international activities in education included the signing of agreements for joint ventures and cooperation between Alberta Education and Japan, planning for the international marketing of Alberta educational services, and arrangements for several school boards to offer summer ESL programs for international students and teachers.

Extension program

- The \$11.3 million extension program assisted students who had dropped out of school and then decided to resume their studies in their home communities.

Finance and Administration Division

Key Achievements in 1991-92

Financial and administrative assistance to school boards

- Alberta Education distributed provincial grants for instruction, student transportation and school capital (totalling approximately \$1.7 billion) to school boards. The basic instructional grants for the year were: \$2,098 for each elementary student, \$2,256 for each junior high student, and \$2433 for each senior high student. (See Table 21, page 67, for more information.)
- Alberta Education provided just under \$110 million in special education grants for students in grades 1-12, and \$19.2 million for ECS special education programs.
- Incremental and contingency grants totalling \$8.1 million were provided to school jurisdictions.
- The School Business Administration Branch assisted school boards by:
 - reviewing their financial operations (8 jurisdictions), transportation management (7 jurisdictions), and electoral subdivisions (1 jurisdiction)
 - arbitrating disputes about tuition fees, student transportation and other issues
 - facilitating the amalgamation of school jurisdictions
 - working with the Faculty of Extension, University of Alberta, to provide a course in business management and administrative procedures for secretary-treasurers.
- Emergency preparedness guidelines for Alberta schools were prepared in cooperation with Alberta Public Safety Services.

School buildings

- The School Buildings Board (SBB) received capital requests totalling \$737.5 million for 1992-94. The SBB approved a total of \$360 million (for new construction, modernization and the Building Quality Restoration Program). The approvals included 37 new schools and replacement schools. The \$360 million was allocated as follows:
 - approval "in full" for 1992 - \$140 million
 - approval "in principle" for 1993 - \$110 million
 - approval "in principle" for 1994 - \$110 million.(For more information, see Figure 5, page 70.)

The Financial Services Division provides financial and administrative services to support Alberta Education's programs, priorities and initiatives. The Division distributes grants to school boards and administers funds for Alberta Education's internal operations. The Division also provides financial and administrative advice and support to school boards and to Alberta Education staff.

- The School Buildings Services Branch assisted school boards by developing policies, guidelines, procedures and criteria related to the 1995 school capital submissions and funding for innovative school facilities.

Internal administration

- The Budget Preparation network application was implemented to allow staff to prepare and submit their budgets on the system.
- A computerized revenue receipt and recording system was developed and implemented to increase operational efficiency and provide management reporting capabilities.
- An on-line payroll system was implemented to reduce paper flow and increase efficiency.
- A sophisticated, cost-saving, electronic printing system was purchased for internal use.
- Accounting, payment of accounts, payroll and computer networking services were provided to Alberta Education staff.

Year of Eligibility*	1983-84	---	1989-90	1990-91	1991-92
Total Number of Eligible Students**	5,815		7,091	7,683	8,007
Eligibility by discrete course levels and specified course combinations:					
Grade 10 Courses Only	1,723		1,674	1,652	1,726
Grade 11 Courses Only	443		443	586	683
Grade 12 Courses Only	147		328	334	318
Grade 10 and 11 Courses Only	1,700		1,780	2,069	2,066
Grade 10 and 12 Courses Only	91		166	136	143
Grade 11 and 12 Courses Only	89		105	144	149
Grade 10, 11 and 12 Courses Only	1,622		2,595	2,762	2,922

*Year of Eligibility is defined as the year a student last completed a course. Students must have an average of at least 80 percent calculated on marks in 5 designated subjects for each course level. (Criteria are available from the Alberta Heritage Scholarship Fund.) To receive the scholarship, a student must be enrolled full-time at a post-secondary institution.

**Total refers to total student counts. Some students were eligible for the scholarship based on their marks in more than one course level. A maximum of \$1500 may be awarded (\$300 for grade 10, \$500 for grade 11, and \$700 for grade 12). The final value of the scholarship depends on the student's scholastic achievement in each of grades 10, 11 and 12.

Per Student Expenditures for Education by Jurisdiction Type

Source: School Business Administration Branch

Table 21a

Divisions, Districts and Counties

	September 1989 – August 1990*	September 1990 – August 1991*
Divisions	\$5,832.19	\$6,269.07
Counties (including the Urban County of Devon)	5,645.23	5,919.46
Public School Districts (excluding Devon)**	4,985.39	5,218.50
Separate School Districts**	5,061.33	5,297.94
All Jurisdictions	5,245.85	5,515.84

*Per student expenditures exclude the Department of National Defence and Lloydminster, but include Early Childhood Services at .5. The per student expenditures were obtained by adding the September to August 1989-90 or 1990-91 expenditures for divisions and districts (reporting on the school fiscal year) to the January to December 1990 or 1991 expenditures for counties (reporting on the calendar year), and dividing the total by the enrolment on September 30 of each year.

**Public school districts include the Roman Catholic public school district, the two Consolidated school districts and the Regional school district. Separate school districts include the four Protestant separate school districts.

Table 21b

Funded Private Schools*

September, 1989 – August, 1990	September, 1990 – August, 1991
\$5,523.08	\$5,603.45

*Enrolments include grades 1 to 12 plus ECS at .5; expenditures may include the entire operation of the private school, including college expenditures if applicable. The per student expenditures were obtained by dividing the total expenditures by the enrolment on September 30 of each year.

Table 21c

Early Childhood Services (ECS)

Private Operators*

September, 1989 – August, 1990	September, 1990 – August, 1991
\$2,503.47	\$2,651.33

*ECS Private Operators data does not include the ECS portion of private schools. The per child expenditures were obtained by dividing the total expenditures by the enrolment on September 30 of each year.

Table 22
